Our Company

C&D ACCESS

About Us...

C&D Access are a provider of Engineering, Fabrication, Inspection, Maintenance, Access and Civil Engineering to the Bulk Storage, Petrochemical, Oil and Gas, Renewables and Power Generation industries, with our main office located in Tyneside, UK.

We offer one stop turnkey solutions to our Clients, in a safe manner, complying with quality requirements, on time and within agreed budget.

Our Core Values

Be Open

We communicate in an honest manner, with trust and mutual respect. Honesty, sincerity and integrity are welcome within our organization.

Value People

Professional development of our Team is at the heart of everything we do. Our company ethos is to work smart, share knowledge and always help each other.

Customer Success

We deliver in accordance with our customers' requirements, on time and within budget, constantly striving to do better, bringing our knowledge and expertise to industry to make a safer environment.

Sustainable Growth

Creating a powerful brand has allowed us to build strong partnerships and continuously revise our business strategies to align our services in an ever-changing market.

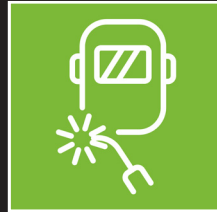

Our Services

What We Offer

INSPECTION

Non-destructive testing, EEMUA 159, coating inspection, welding inspection and advanced NDT.

FABRICATION & REPAIR

Storage tank floor replacement, pipework and structural steel.

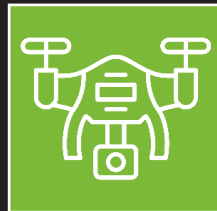

CIVILS

Bund wall revetment, ground investigation, culvert installation, excavation and reinforced concrete structures.

ENGINEERING

Design and calculation in accordance with relevant codes and standards.

SURVEYS

Drone surveys, confined space inspections, 3D modelling, photogrammetry and thermographic surveys.

ACCESS

Providing versatile solutions for confined space entry, working at height and rescue.

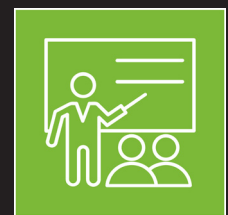

MAINTENANCE

Maintenance in compliance with Construction, Design and Management Regulations.

RENEWABLES

Fabrication supervision and knowledge transfer of European and International standards.

TRAINING

Boasting a brand-new, state-of-the-art facility, putting you first and taking your career ahead.

Turnkey Solutions C&D ACCESS

Specialist inspection services

C&D Access carry out aerial inspections, surveying and photography using remote operated aerial vehicles. We can undertake any aspect of aerial photography to the highest standards, safely and remotely.

Our team thrives on challenges. We are always looking how to develop the existing technology and implement inspection techniques into our drone platforms.

We create 3D point cloud, orthomosaic and digital elevation models to evaluate damages, erosion, stock volume or to obtain accurate data for surveying and condition monitoring purposes.

C&D Access utilise the latest in inspection technologies. Our capabilities include:

- Conventional NDT methods
- Phased Array Ultrasonics
- Time of Flight Diffraction
- MFL (Magnetic Flow Leakage) with critical zone coverage up to 100 mm
- Vacuum Box testing
- Thermography
- ACFM (Alternating Current Field Measurement)

Our technicians have a wealth of knowledge and experience and are certified to ISO 9712 and SNT-TC-1A standards.

We are an accredited Inspection Body to ISO 17020.

Site Services

On time, within budget

C&D Access have over 8000 sq ft dedicated to carbon and stainless steel welding fabrication with a maximum capacity of 4 tonnes and 12 x 4 x 4 meters.

Our facilities include areas for surface preparation and coating, ensuring environmental conditions are maintained throughout the process.

We are certified in accordance with ISO 3834-2 and EN 1090-1 for EXC2.

We provide offsite & onsite fabrication of pipework and steel structures, storage tank repair, foundations and concrete bases, earthworks, ducting and drainage systems, rope access, fabric maintenance, lagging, blasting and painting.

We have a passionate commitment in taking care of our people and delivering works to the very highest standards, on time and within budget.

Safety is at heart of everything we do, and we put the health and wellbeing of our people first, striving to implement the most efficient and environmentally friendly solutions available while reducing the environmental impact of our activities at all times.

C&D ACCESS

Safety and Quality Strategies

To maintain our commitment, we are constantly looking out for new technologies and state-of-the-art solutions that can help us to support our clients.

Research and development is essential to maintain a sustainable growth, continuously revising our business strategies to align our services in an ever-changing market.

As a Company, we provide a safe system and culture of care, thereby reducing avoidable harm – developing a culture of transparency, learning from safety incidents and quality escapes and using these to drive quality improvement.

We have the necessary experience and expertise to provide a full turnkey project management solution involving all elements of our service capabilities.

Working to our comprehensive and audited management system our managers deliver projects with the highest regard to safety, quality and environmental constraints, whilst maintaining a firm control on cost and programme, ultimately delivering a first class project management service from conception through to final completion and handover.

Engineering

Making a difference in everything we do

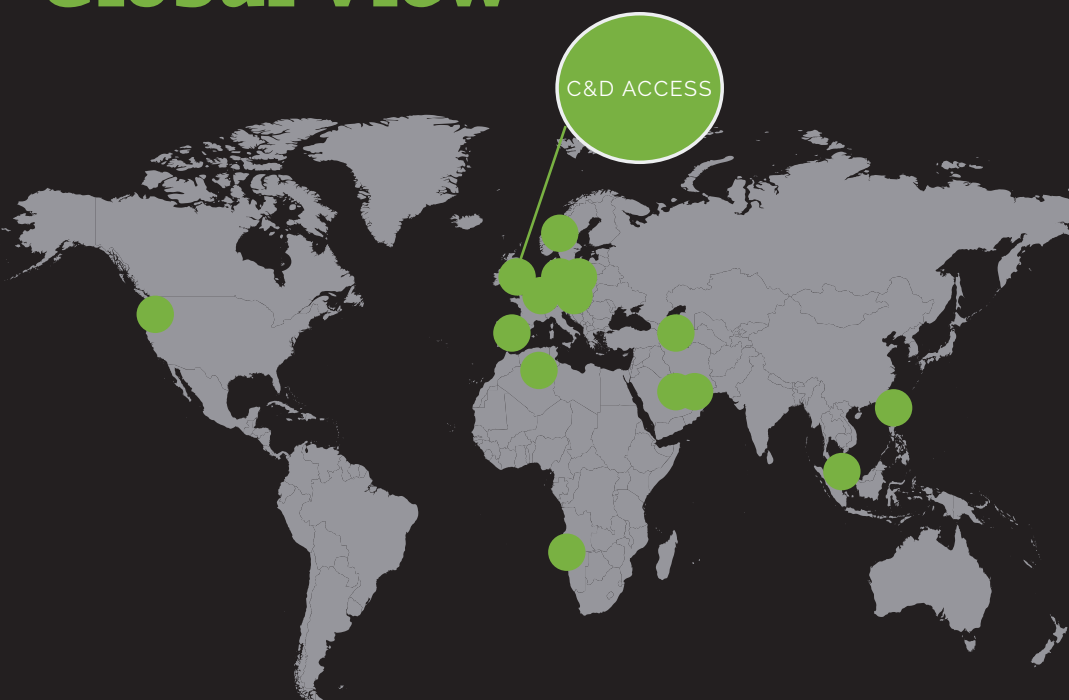

Our engineers and designers comprise of qualified, highly skilled and experienced individuals with the capability to provide designs in all aspects of engineering.

We have the ability to fulfil the role of Principle Designer and Principal Contractor in line with CDM 2015 Regulations, allowing us to ensure that all elements of a design are completed with health and safety.

We have the capability to deliver the following services:

- Principle Designer and Principle Contractor Roles (CDM 2015).
- Front End Engineering Design (FEED) Studies.
- Engineering surveys complete with detailed condition / performance reports.
- Production of design briefs, specification and scope of works documents.
- Detailed engineering services design layouts 2D & 3D.
- Structural calculations.
- Technical documentation development of P&ID's,
